SUMMARY

Applied AI & Data Science undergraduate at IIT Jodhpur with hands-on experience in Python, JavaScript, SQL, data analysis, machine learning, and web development. Experienced in building practical projects, contributing to open-source repositories, working with Git/GitHub and Linux, and applying AI tools such as Hugging Face, Gemini, and RAG workflows. Interested in software development, AI/ML, and data-driven applications..

EDUCATION

Indian Institute of Technology (IIT), Jodhpur <i>B.S. in Applied AI & Data Science CGPA: 9.44 / 10.0</i>	Sept 2025 – Present
LeapStart School of Technology <i>Experiential Learning Program</i>	Sept 2025 – Present

TECHNICAL SKILLS

Languages: Python, JavaScript, SQL, PHP
Frontend: React, Tailwind CSS, Shadcn UI, HTML5, CSS3
Backend & APIs: FastAPI, REST APIs
Databases & Cloud: PostgreSQL, MySQL, Docker, CI/CD, Vercel, Render, Git, Linux, Shell Scripting
AI / ML & GenAI: Hugging Face Transformers, Fine-Tuning (SFT, LoRA/PEFT), RAG, NLP, Gemini, Groq, LLM Workflows, Prompt Engineering, Scikit-learn, Pandas, NumPy, Matplotlib, Seaborn, Plotly
Security & Tools: Wireshark, Nmap, Burp Suite, Postman, Payload CMS, Firebase, Cloudinary

EXPERIENCE

Open Source Contributor — GirlScript Summer of Code (GSSoC)	May 2026 – Present
- Selected among 10,000+ applicants; contributing across multiple full-stack and ML repositories via pull requests, issue fixes, and documentation. - Collaborating with maintainers through Git workflows, code reviews, and GitHub project boards — the same delivery practices used in team-based product engineering.	
Freelance Data Analyst — Fiverr	May 2024 – Jun 2024
- Cleaned, deduplicated, and standardised 10+ client datasets (null handling, schema validation, column normalisation) feeding downstream reporting and analytics pipelines. - Delivered analysis-ready datasets on schedule; maintained a 5-star rating across all engagements.	

PROJECTS

LMS — Scalable Real-Time Platform <i>Node.js · PostgreSQL · Redis · Socket.IO · AWS · Fastify · BullMQ</i>	2026 – Present
- Core contributor to an in-development real-time LMS spanning chat, assessments, geofenced attendance, scheduling, and gamification modules. - Designed a 30+ table PostgreSQL schema (UUIDs, foreign keys, indexing, RBAC) and a real-time Socket.IO + Redis messaging layer. - Integrated AWS Rekognition, Fastify, BullMQ, PgBouncer, and MeiliSearch for scalable, cloud-native backend workflows.	
PawSethu — Pet Identity Platform <i>Next.js · Fastify · PostgreSQL · Prisma · AWS S3 · Google Maps</i>	2026 – Present
- Building an MVP that gives every pet a secure QR-based digital identity with medical records, vaccination history, and an emergency health vault. - Designed an API-first Fastify + PostgreSQL/Prisma backend with JWT auth, AWS S3 document storage, and Google Maps-powered discovery of nearby pet services.	
Roast My Project — Production Generative AI SaaS <i>Next.js 16 · React 19 · Gemini · Groq · Payload CMS</i>	2026
- Built a multi-model GenAI platform that dynamically routes between Google Gemini and Groq LLMs for project reviews, resume analysis, and startup validation. - Implemented Firebase/Twilio auth, Cloudinary uploads, and Payload CMS; deployed a production-ready SaaS.	
KellyboiGPT — Fine-Tuned Local LLM <i>Python · Fine-Tuning · FastAPI · React</i>	2026
Fine-tuned a self-hosted LLM on a Linux systems textbook for a fully offline study companion; owned dataset prep, supervised fine-tuning, and on-device inference behind a FastAPI backend.	
Portfolio CMS — Enterprise MERN Monorepo <i>React · Express · MongoDB · Turborepo</i>	2026
Built an enterprise-grade CMS with a React admin dashboard, Express REST API, and a Turborepo monorepo for clean, scalable multi-package code organisation.	
Additional: Ascend (in-progress offline-first AI life OS — React Native, Drizzle ORM, multi-provider AI) · Alimony.AI (full-stack LLM legal-tech) · Shield (privacy/security browser extension) · SINGULARITY (cinematic 3D web, Three.js/GLSL) · Gesture Recognition (Computer Vision).	

ACHIEVEMENTS

• Member, Google Developer Group (GDG) Hyderabad — workshops, hackathons & developer sessions. • Merged Open-Source PR: Contributed to the official LangChain repository; pull request reviewed and merged by project maintainers. • Google BigCode Challenge — Round 2, Top 1,500 in India. • Selected GSSoC contributor (10,000+ applicants). • 1100+ GitHub commits across full-stack & ML projects. • 9.44 CGPA at IIT Jodhpur. • Multiple Olympiad & state-level academic ranks.
